Summary

Backend Developer focused on **Python, Django & REST API design** with 3+ years of experience building and scaling distributed applications, automating backend processes, and optimizing SQL workflows.

Tools, Technologies & Skills

Programming Languages

C, C++, JavaScript, Python

Frontend

ReactJS

Data Processing & ML

Pandas, Numpy, Scikit-Learn

Project Management

Git, Github

Others

Data Structures & Algorithms, API Design, SQL Optimization, Feature Engineering

Backend

Django, Django REST Framework, Flask

Database

Mssql, Mysql

DevOps/Deployment

Docker, Docker Hub

Authentication

JWT, Session-based Auth

Professional Experience

Jan 2025 – Sep 2025

Senior Software Engineer, Leadsoft Bangladesh Limited

- Led cross-functional teams to resolve complex customer operations issues, ensuring timely delivery and minimal impact on business operations.
- Mentored junior engineers, provided code reviews, and promoted best practices in software design and development.
- Collaborated directly with stakeholders to gather business requirements, translate them into technical specifications, and drive end-to-end project execution.
- Reduced backend processing time by **30%+** by optimizing SQL queries and automations

Jun 2023 – Jan 2025
Dhaka, Bangladesh

Software Engineer, Leadsoft Bangladesh Limited [!\[\]\(41316894b4442b785f9af741df7b015f_img.jpg\)](#)

- Handled complex customer operations issues and fixed them before deadlines, ensuring smooth operation.
- Engaged with clients to analyze new requirements and implemented tailored deployments to meet their specific needs.
- Developed SQL scripts to enhance customer support.

Sep 2022 – Jun 2023
Dhaka, Bangladesh

Junior Software Engineer, Leadsoft Bangladesh Limited

- Configured software environments, deployed updates, and resolved SQL database errors for capital market clients, ensuring seamless operations.
- Customized reports to meet customer requirements, enhancing software functionality and enabling personalized data analysis.
- Performed basic network troubleshooting (e.g. checking connectivity, DNS, ping/traceroute diagnostics, router status) to support deployment and resolve infrastructure issues.

Jun 2022 – Aug 2022
Dhaka, Bangladesh

Intern, Leadsoft Bangladesh Limited

- Acquired business domain knowledge of Capital Market.
- Hands on experiences on SQL Server, IIS Configuration, Crystal Report.

Education

2015 – 2020
Dhaka, Bangladesh

Bsc in Computer Science And Engineering, North South University

Projects

Breast Cancer Prediction [!\[\]\(b72e84cb099e4a05a70526a34c781999_img.jpg\)](#)

- Technologies: Python, Pandas, Numpy, Scikit-Learn
- This project aims to build a machine learning model to predict breast cancer diagnosis (Benign or Malignant) based on various features extracted from digital images of fine needle aspirate (FNA) of breast masses.

Ecommerce platform Yearly spend prediction [!\[\]\(abb0e3fb484eee4e2a4c0f44c60e18d1_img.jpg\)](#)

- Technologies: Python, Pandas, Scikit_Learn
- This project aims to build a linear regression model to predict the yearly amount spent by customers of an e-commerce company. The goal is to understand the factors influencing customer spending and to predict future revenue based on customer characteristics.

Backoffice Software

- Technologies: Python, Django-rest-framework, React js
- Develop a full stack back office software to manage and track mutual investment on share market.
